

Programmierer Sprüche

Beware of programmers who carry screwdrivers.

Sometimes it pays to stay in bed on Monday, rather than spending the rest of the week debugging Monday's code.

A program is a Spell cast over a computer, turning input into error messages.

Real programmers are those that can sleep in front of terminals with their eyes open.

Don't get suckered in by the comments... they can be terribly misleading.

A crash is when your program dies. When your program dies, it is an 'idiosyncrasy'.

Any sufficiently advanced BUG is indistinguishable from a feature.

If you're masochistic enough to program, we're not going to stop you.
